

# GDRI – Power systems and SmartGrids

[www.cnrs.fr](http://www.cnrs.fr)

# Progress and actions 2016-2017

- ① Workshop + Summer School organized in France (Corsica) in June 2016
- ① Regular exchanges between NTU and CNRS researchers
  - Several visits to France in the framework of GDRI 2016 - 2017:
    - Visit of research labs
    - Combined visits: research labs and industry partners (ATOS, EDF, ENEDIS, ENGIE, GEG, Schneider ...)
    - Visit of Singapore officials: EMA, Ministry of Trade and Industry, NTU (Grenoble, Lyon and Paris)
    - Several skype meetings
- ① Joint participation at IEEE General Meeting (Boston 2016)
- ① Invitation to present the REIDS project at IEEE SmartGrids for SmartCities organized by CNRS/G2ELab in Paris 2016

# Progress and actions 2016-2017

- Iterative discussions between France and Singapore to build A CREATE proposal
  - White paper + first version of the planning and budget
  - Upcoming discussion on the full project proposal (Singapour WS)
- Research oriented actions
  - 1 Ass. Prof. from Grenoble currently planning on coming to NTU for six months starting Sept. 2018
  - 1 joint PhD planned to start in the scope of WP2 on microgrids stability from the Power Electronics point of view
  - Currently 1 French mentorship of a PhD in NTU
- Discussion on internship exchange
